

*Why you should select me?*

I possess the skills that you require in terms of

a) Programming

PHP, RDBMS (MySQL), NoSQL (MongoDB), JavaScript, jQuery, HTML, CSS, LAMP,

b) Project Management,

Agile, SCRUM, eXtreme Programming, Software Engineering, Resource management etc.

c) Technologies

Cloud Computing, SaaS, PaaS, Load Balancing, Scalable Systems.

I have been a freelance developer from last 5 years (started things in my 10<sup>th</sup> Grade). Working as a full time developer/architect with well-known HR agency in order to develop Social HRM system. During this time I came in contact with variety of people and organizations of software industry in very early part of my life. I have worked with several start-ups and served them as developer & technical adviser; also performed well in academics (BE-IT with 61% which is 1<sup>st</sup> Class equivalent of BS) and co-curricular initiatives such as spreading technology awareness to my friends and colleagues.

I would like to take up the opportunity to work with you and would love to conquer the challenges. Looking forward for your positive reply and hope that you would give me a chance to express and explore myself better.

Sincerely,

**Mayur Ahir**
